SUBJECT: Offer of FREE Professional Technical Writing help

Dear Dr. Centeno, My name is: Susan Marie [Cassady] – Neuhart.

I hope that my offer (of FREE assistance) finds you well.

Now, My [resume](http://hansandcassady.org/) of education and experience is posted on my personal web site: <http://hansandcassady.org/>. As you will see, should you find the time to visit my personal HOME page – I am working with the USA-FDA (staff), to understand all elements of the information required to file a " FDA-356h Form".

As you may know, this FDA form (356h) accompanies regulatory submissions (to FDA offices) for New Drug Applications (NDAs), Biologic License Applications (BLAs), Abbreviated New Drug Applications (ANDAs), and Supplements. The (356h) form is (purportedly) intended to describe the reason for, and the content of each submission (for FDA approval) and [when prepared correctly] the form “captures” information used to populate “automated” FDA systems. Dr. Centeno (Sir), I designed “automated information capture” systems – such as this – when I was a year 1987 employee of Battelle Memorial Institute (“Yucca Mountain Project”) [[disposal of radioactive waste](#)]. I have traveled all over the United States

of America [1978-2012] – as a student, Professional writer and Small Business Owner.

Today, I am NOT employed – by the [USA-FDA](#). That is, I choose to be a “retired” USA Citizen [at this time].

On a selfish note, I choose to offer to “help” you – for “FREE” - because, I want to know that your [RegeneXX](#) product and associated medical procedures – are safe and effective. If, we can work together – and, I become fully convinced – that [RegeneXX](#) is safe & effective – I may be inclined to use [RegeneXX](#). Thus, there is the potential, that I may be your “first fully informed” [RegeneXX](#) End-user. Please note my formal education in Molecular Genetics and experimental science (at [UWGB](#)). I learned from the “*best in the world*” – K.White, C.Ihrke, A.Goldsby & N.Sell were my professors.

I look forward to hearing from you – personally. That is, only you may use my unpublished Email address to respond to this message. I do NOT use a telephone – without “special” preparations – since my SAH@MCA [2012] event. Neurosurgeon Victor L. Perry M.D. saved my life – by performing an eight hour full craniotomy procedure. Now, five years post (the event) – I am doing well. I perform 27+ YOGA poses daily.

Very Truly, - Susan
