

2-17-2022

Via email to: secretary@state.gov (and Congressman MikwTurner, Ohio 10, et al.)

Dear Antony Blinken - [United States Secretary of State](#) [A, B].

Honorable Sir, my name is Susan Neuhart. I am a US Citizen - born 1954 - in Columbus, Ohio. I am also [most recently] a retired "Software Engineering Technical Writer". I participated in Software Engineering efforts - for various clients - including the US Military - since 1977. This fact is pertinent to my message - today - because, I was trained to think analytically and logically - from a young age. I was fortunate to be born with a talent - for language - which translated to computers - at the dawn of the "space age". I eventually graduated from the University of Wisconsin - with a degree in science.

ARGUMENT: Obviously, this is our American "Battleship Row" moment. [C.]

I know the "incident" – to which I refer - lives in American "infamy" - however ... the **logic** - of the attack is indisputable. For this reason – alone – we should act decisively; however, there are more reasons.

In fact, lawless Oligarchs cannot operate – on an earth that ALSO countenances "American Free Enterprise" - with a free and fair legal system - available to all. So, "they" must destroy "us" - and - our ways. At best, "we" represent an existential threat to "their" way of life - and, we just feel sorry for them: That "THEY" are "trapped" - in that poor way of life.

Next, as has been made clear – for weeks – Mr. Putin is a liar.

Thanks to YOUR efforts, the Russians have placed their unreasonable demands – in writing.

Published photos make it obvious – to the world - "the Russians" have their military assets - lined up -to threaten Ukraine – and NATO members.

Their denials "strain credulity".

TIME IS OF THE ESSENCE SIR!

Consider, The Russians have their military "stuff" - lined up - like poker chips (or checkers) - along three sides of Ukraine. (x, y, z).

The Russian "aim" apparently - (in placing these military assets there) - is/was - to "intimidate" others - with a show of force. Which, such action is a kind of "Terrorism" - and, a violation of International Law. As cited & defined here:

[<https://www.law.cornell.edu/wex/terrorism> ::
<https://www.law.cornell.edu/uscode/text/18/2331#1>]

Thus, it makes perfect sense - to avail ourselves of this "Ukrainian -Pearl Harbor" opportunity; And, degrade our mortal enemy's military assets NOW! - with the PRECISION Guided Munitions (PGM) systems [that] the American people have invented, designed, built, coded, tested - bought and paid for!

As you may know, these "PGM systems" were originally - ostensibly - designed - to stop "terrorism" – in the "Middle-East". And, "terrorism" is what the Russians have brought to bear – in the heart of Europe.

IF, the associated system diagrams [required for such Military Systems] are not sufficient (for the Ukrainians to act on), WE (OR our trained agents) could set the devices up - and, let a "Ukrainian" push the button. These systems are designed to be operated "remotely"; Thus, any required human "assets" could be in Poland, Germany, France etc. Ukrainian President Zelenskyy – may even find this amusing.

So, I suggest - we "flip the table" – and give the Russians a "real show"!

I mean! - after a proper warning - of course! This will make our actions distinct from "Pearl Harbor"- where the USA lost more than 2,000 servicemen.

Personally, I do not want any Russian (or any other person) harmed. With care - I think harm can be avoided - and, the point simultaneously made.

REPUBLICAN "Mike Turner" is my congressman. Ohio-10. He also represents Wright Patterson (WPAFB) - located near me. WPAFB has a complete complement of the F-35 series - and F-18s, F-16s etc.

Clearly - any "threatening" Russian weapon system we leave intact [TODAY] - will surely be used against us (or someone else) - in the future.

MOREOVER – IF A "RETIRED" TECHNICAL WRITER **KNOWS** – AMERICA HAS THESE SYSTEMS – it is certain – [that] Mr. Putin "knows" ... Thus, to fail to use them – merely encourages a bully. At the least, we are perplexing him.

Finally, It seems incomprehensible - and unconscionable - to NOT use military systems – designed for a specific purpose – [NOW AT HAND!] - while simultaneously requesting additional defense spending (for existential future conflicts). The fiscal **year 2023** Defense Budget REQUEST – is in the RECENT NEWS. [F.]

I submitted a full report - on our PGM Systems - to President Biden:
<http://hansandcassady.org/UKRAINE-01.html> He has not replied yet.

TORA! Tiger! TORA! It may surprise YOU to find - [that] I am a "YOGA-Posin' Democrat". AND, an original Obama girl! I did my best to help get Biden & Kamala elected. With Yoga poses. [E] In a REPUBLICAN district. You may mention this - when you speak with President Biden.

Respectfully, Susan
