To: Judge McAfee: **AS INSTRUCTED*** ; Fani Willis – Offices; President Biden

SUBJECT: Thank You! - for your Public Service! & FRIEND OF THE COURT
COMMENT :: Attempted Intimidation of a Fulton County Georgia Official - by a
Georgia attorney Ashleigh Merchant ***

Dear Judge McAfee (Sir)

- **AND Ms. Fani - District Attorney, Fulton County GA**

I have extended family [that] lives in Georgia - related to the NCR Corporation
building offices [LOCATED there] - many years ago. **

- My name is Susan Neuhart (nee "CassAdy").

- I was born (in 1954) - and, grew up in Columbus, Ohio.

- I will be 70(seventy) years old - in a few days. Thus, I can tell you – IF you were
going to hire me to do something (that I knew) – I'd catch HELL – the rest of my
life for – I would charge extra – to do it. **So, good for Nathan Wade!**

- I have been married - and partnered - to Han Neuhart - for 42+ years. Like me -
Hans is an American Citizen.

- My Congressional Representative [Ohio District 10] - is Mike Turner.

Indeed, we (YOU and me) may have little in common - beyond, my admiration for
your Public Service; But I want to offer an experience - that I had - when, I
accepted my 'first job' - after I graduated - from the University of Wisconsin [that]
I believe my experience is relevant – to YOUR CURRENT CASE AGAINST
TRUMP, ET AL AND, **RELATED DECISIONS YOU MUST MAKE.**

<https://s3.documentcloud.org/documents/23909616/23sc188947-criminal-indictment.pdf> < 98 pages

You may show this (document) to Judge McAfee - if you would like. I intend to send it to his assistant. He instructs persons to SUBMIT ("friend Of the court - comments - through her")

My BS degree [awarded by the University of Wisconsin Green Bay Campus (UWGB) 1982] is titled "**Environmental Science & Communications**".

Indeed, my "original plan" - was to "get a "good education" - So, [that] I could get a GOOD JOB!" (Just like the Government Commercial - bid Americans to do.) I had been a Union clerk - for Krogers Grocery - since I was 16 years old. I had a baby when I was a teen-ager; And, decided to divorce - the child's father - circa 1977. Primarily - related to my desire to get a college degree. He insisted [that] my place was "in the kitchen" ONLY. For financial reasons - I awarded custody (of our baby girl) - to the child's father - at our divorce. The Judge was Ohio's "Tyack".

He worked with my attorney - to write "NEW LAW" (I was told). The father - had a Masters Degree - in Business (an MBA). I had helped him to earn that degree. And, I had bought the house - we were ALL living in (1977) - related - to an Ohio driver "Jumping" a traffic light - in Columbus, Ohio - when I was pregnant. (There were numerous witnesses - who gave statements - to the police officers - at the scene.)

In fact, I was pregnant - and on my way to work (that day). My pelvic girdle was shattered - in several places - as my body collided with my car's steering wheel. Thankfully, the car's body "crumpled" - as designed - when it collided with the intersection telephone pole. This new design absorbed - some of the impact force - preventing me - from being killed instantly.

My obstetrician (L. David Hall MD) was hopeful - but, made no promises. He understood how well "nature" had padded the embryo/fetus; But, also knew [that] my "birth canal" - had been affected (severely). Moreover, he could not prescribe any drug "helpful" (to me) - as I was very pregnant. And, any "drug" - would affect the developing human.

In fact, the child emerged "perfect" - nine months and two days - after my marriage. I nearly died - at the birth event - due to Toxemia. This condition (often fatal) manifested - as a result of my shattered pelvic girdle. She was born in August - of 1973.

She is an attorney - in Washington DC - today. Married to the Director - of a large Federal Agency. Both were previously involved in "USA politics". Jack was a director of Mark Dayton's Senate campaign. Dawn worked - to help elect John Conyers; and, she was (also) the Associate Director of the Federal Bureau of Investigation (FBI) - for James Comey.

At my divorce - circa 1977 - pollution was everywhere - in America - AND, rivers were literally on fire! The Environmental Protection Agency (EPA) - had been invented - to "clean - this mess - UP!" Then too - my father ("Milo Gerald Cassady"), had a business - installing wall paper - for people that wanted it. He (also) bid - and won! - the contract - for removing "asbestos" insulation - from Columbus Ohio Public Schools. Soon after he started (the project) - he began to cough. He died - October 31st - of 1964. He had been married - to my mother - for 30(thirty) years. They did have seven children. I am number five. I was 10 years old - when he died. And, I am the first - and only one (so far) - to graduate - from a four year - land grant college: as cited above (**UWGB**).

Similar - to Fani - I have a "famous" relative. [Her father was a "Black Panther" - I believe.] My Uncle Pearl "Cassady" - was the father of Howard "hopAlong" Cassady. He won the Heisman football Trophy - in 1955.

Indeed, during my "growing up" - in the "bottoms area" - of "inner-city" Columbus, Ohio - boys, would pretend to "like me" - on the hope of meeting Howard. Which, I only met him one time. And, this event - was controversial. (A)

So - I did graduate - from the University of Wisconsin - Green Bay Campus (in the Summer 1982). But, at my graduation - the EPA was not hiring "NEW College Graduates". So, it was brought to my attention - the NCR Corporation - had an "opening" - in Ohio - for a person [that] could "program" computers. Which - although my DEGREE said nothing about "Programming Computers", I had

earned - my Federal Work-Study Award - by "programming" - the UWGB VAX/vms computer system - for UWGB professors - to report the results - of the research [that] they were doing - on the "Bay of Green Bay" - through the USA Clean Water ACT.

I interviewed (with NCR) - and, I was hired.

I had ALSO created the "Automated Weather Station System" - for UWGB - through a National Science Foundation Grant. This is what the male Engineers - [THAT] interviewed me - at NCR - cared about! AND - I had created an End User's manual - so that the New Software could be updated - and maintained. The "weather database" my software created - enabled the UW - Green Bay Campus to offer courses in Meteorology, etc.

The NCR Corporation "work site" was a new Engineering & Manufacturing facility - located near Cambridge, Ohio. So, I relocated - to Cambridge, Ohio - to begin work - at NCR - in the fall of 1982.

The first order of business - was, to find a place to live. Which, I did. I secured a suite of rooms - in a rehabilitated "old mansion" - near a park - in the small town. My "living space" had a small kitchen - a sitting room and a shower. Cambridge, Ohio also offered a main street - with clothing stores and gas stations.

Born and raised - in a comparatively "big city" - I decided to go and check it out - ALL by myself. The main street appeared "charming". I parked my car - and, began to walk. A traffic light stopped me. Suddenly - some local "country boys" surrounded me. They were "white guys" - all leering at me - and laughing. This never happened (to me) in Columbus, Ohio. Then, one guy - literally - tips his hat to me - and said: "I been wanting me a woman. You sure are pretty." ... I was horrified! I crossed the street - not waiting for the light - to change. The young men - broke into laughter - declaring: "I'll bet she's married!". Eventually, I made it to my car - and, drove to the rooms [that] I had rented - in the old mansion.

In the days that followed - I had other experiences with the "local" people - and, I began my "professional job" - at NCR. 1, 2, 3, 4, 5, 6 and 7.

(1) I liked my job - at NCR. I was excited to go in each day. I woke up early. I would get an "Egg McMuffin" - to take to my desk. I often made the department coffee - being the first to arrive. I dressed in a 3-piece suit. I was always careful - to be modestly - and professionally - attired. As, I had been instructed - by a UWGB "consulting service".

(2) Now - in a "skiing class" - at UWGB; I had torn my ACL (knee) ligament. It healed - but, my knee is prone to "pop" out - if I move the wrong way. So, one chilly day - it must have been my first full Saturday (in Cambridge, Ohio - 1982) - I decide to "go for a jog" - around the park. A recreation facility - literally, ONLY across the street - from my living quarters. So, I don my new running suit - and, begin to perform "warm-up" stretches. ... I decide to perform a karate "scissor-kick"; AND, I landed on the leg (my left leg) with the ACL injury - wrong. Very wrong! My knee pops out - of its socket. I scream in pain - and collapse - to the frozen ground. No one comes. I literally drag myself to the big front porch of the old mansion. I sort of cry out "Help me!" It is a a whimper. I am getting colder - and crying. ... Then, a young white man comes around the corner - of the old house. He smiles. He inquires - "Can, I help you?" I explain - as best [that] I can. He has a truck. He offers to drive me to the nearby Emergency room. He explains [that] he lives in the "attic" area of the old mansion. He is a Vietnam veteran. He saw me move in. He figured that I worked for the "new NCR facility". I accept his offer - of a ride - to the Emergency Room. Once there, the Doctor - merely "pops" my knee - back into its socket - and, gives me a brace. I feel instant relief. The soldier takes me back to my rooms - at the old house. I thank him. We have tea. Then he leaves. I learn that he was exposed to some chemical - in Vietnam. He explained [that] is why he shakes.

(3) Then, one night - as I return from work - a Sheriff's deputy [with red hair AND a "Smoky Bear Hat"] greets me - with a big smile. He is very polite. He lives in another part of the "old mansion". My brother-in-law (Peter J. Herdt) had become

the Chief Of police - in Riverside, Ohio. They know - each other! - Or, my sister (Pete's wife - Barbara Cassady) is "checking up" - on her little sister?

(4) Then, NCR decides to repair - the "employee parking lot". They hire a local company. The company fences off a part of the employee parking lot - to perform their work - safely. I arrive early. I park my NEW car and begin to walk toward the Engineering employee entrance. The "lot workers" begin to make noises. Literally, whoops and shouts. **"Wolf whistles" - they are called.** They seem to be in a competition - to get me to look at them. But, my "big city" training says: "ignore them".

... I make it to the "employee entrance". I am shaking - and angry. This goes on for a couple of days. I remain annoyed (by it) - but, determined NOT - to let them ("the parking lot workers") win.

Then, one day - I am late into the lunch room. The ("the parking lot workers") enter. They sit together - at a table. They ALL have bag lunches – but, have come in - for the cold milk, hot fresh coffee, etc. I rise to return my tray. The kitchen staff is cleaning up. The young white men ("the parking lot workers") hunker down into their seats. They shush each other. I return my tray - And, inexplicably - for I was NOT a foolish girl - I approach their table. I stop at the end. My voice shaking - I say "I know who you are - and, I want you to cut it out! If you don't stop - I will report you!" Then, I turn and walk away. I make it to the lady's room - before - I begin to cry.

(5) When I make it to my NCR Engineering department offices - **Nellie**, the Engineering director's secretary - embraces me - and inquires - "Dear, what is wrong?" ... I explain through sobs - tears and snot running down my face. Nellie (thankfully) - has boxes of tissues. We go into a small - very small - office. She gets me to laugh. "Nellie" is a senior woman - beautifully attired in lace (each day) - AND approaching retirement. She pats my knee - and, says: "It's because you're so pretty!" ... "Boys around here are not used to seeing a girl - like you! ... "You're thin. You dress in a suit. ... And, you walk - "...like you own the place."

In fact, I did feel - like I had earned - my place (at my job). My mind - was on my work. I enjoyed my assignments - AND, I was very good at it (my work). Perhaps, I did have a bit of a "swagger"?

The NCR Corporation had never offered a product - like the one that I was creating an "End User Manual" for. The NCR E&M Cambridge, Ohio OFFICE - was selling "software & services" - in addition to hardware "checkout" terminals. It was a "Retail Terminal System" product - AND, to work **properly** - it had to be "programmed" - I.E. specifically "customized" (by client "coders") - for each "Point-Of-Sale" environment (be it a Mall's Retailer - or, a corner grocery store). In 1982, Customers were using "credit cards" - as well as cash - for banks spread all over the world. And ONLY - because, I had been a "computer programmer" - at the University of Wisconsin (for the National Science Foundation) projects - I knew WHAT - the NCR client's system programmers - needed to know - to do their job. AND, I was uniquely "talented" - to want - to explain it. Indeed, I have loved to "explain things" - since, I was a little girl.

(6) My duties were stationed in "NCR Technical Publications" - but my boss ask me "...if I wanted - to move - to Engineering? - Or, to product Management?". I replied "no". But, in fact, I already - had my eye - on the Technical Publication Department's Graphic Artist. Which, (this) MAY have influenced my thinking. I saw him - when I "interviewed - but he was not permitted to speak (to me). ... I found out later, "He" was younger than me - and, dating several local women.

My NCR "work-mate" & acquaintance "Michelle" [who also worked with him] - was on my side; and, she wanted to do some "**match-making**". She informed me [that] a company "cook-out" was coming. Of course, Michelle knows [this] - because, it was her idea. She was the Department's "type-setter" - using the latest technology - in 1982 - to prep the NCR Product publications - for printing. The "cook-out" - being brewed - is in-fact a "bonfire" - with beer, beans and wieners - to be held - at Thelma's Farm. Thema - is married to Ron. Who is also Michelle's work-mate. Michelle reminds me of how "dangerous" - the unlighted country roads can be; And, she mentions - to Hans - "Susan may need a ride." Young Hans comes to my rescue! He offers me a "ride".

Fani and Judge McAfee, the point to telling you ALL this - Is (that) I was attracted - to Hans - And, thank goodness - he liked skinny girls. His primary interest - was NOT - Where is your daughter? Hans did inquire (of me) - about how much money - did I make? But ONLY, insofar as compared - to what HE made. He was merely curious. Indeed, (like Fani!) I always paid my own way - and, sometimes - I treated! It was MY Wish - to do expensive things! AND, I considered Hans was my "trophy"!

Very important! Working - at NCR - in Cambridge, Ohio - I was only 90(ninety) miles from my daughter's "home" - with her father - in Whitehall, Ohio. He was a corporate executive. In addition - to his "Masters" - he got a JD - at Capital LAW School. He employed a maid & a sitting service. AND, I paid "child-support" (to him).

In fact, my "Ex-husband" - was born and raised in "Crooksville, Ohio - AND, he had "friends" - who were dating women (that) worked in the NCR Cambridge, Ohio manufacturing facility!. Thus, it was not long - before, the "news" got out: The "new girl" (I was 28 years old) - has a daughter - from a previous marriage. My very presence "upset" numerous women - in the area. Not to mention - the women - who were - previously - dating Hans.

(7) Hans' family (prominent in the area - as "successful horse breeders") - was thus informed & cared greatly (then) - THAT I had been married previously - and, [that] I had a little girl.

They [all these Cambridge, Ohio area] were ALL - "devout Christians" - so, my 9(nine) year old daughter's very existence - mattered (to them)! For, I was [by definition] a "fallen-woman" - as the Bible puts it; and, thus "naturally" meant (to be) encumbered (forever!) by the child - of my previous marriage.

Which - in 1982 - it never occurred - to these fine "Christian" people - [that] - a "good-woman" - would NOT have custody - of her child. Literally, dozens of these "good people" jumped to conclusions about me - as a person.

Yet NCR (the Corporation) liked me so much - they (**NCR**) literally permitted me to "quit" - AND, then hired me back. (I "quit" over a "pay-raise" dispute - with HR). And, I came back - for Hans. Hans and I were married - by the Mayor of Cambridge, Ohio. We "eloped" - and, "honeymooned" in Myrtle Beach, South Carolina - with my sisters - in 1983.

Finally, I can tell you - I cared greatly - for Hans - from the first. But, when my assigned "END User's Manual" (for the new NCR ETS-B product) needed a "graphic" illustration - EX: "PUSH BUTTON LOCATED HERE" - I took the job - to the most capable GRAPHIC ILLUSTRATOR - AT NCR - E&M - CAMBRIDGE, OHIO. **To me, this was Hans!** Moreover, Hans was patient - with me - A (then) **new** Software Engineering Technical Writer.

Thus, in this - Ms. Fani Willis (a black woman) and Ms. Susan Marie Neuhart [nee "Cassady"] - (a white woman) - are alike!

She is the "boss". And, she chose to hire him [NATHAN WADE]. Which - choosing "who" to work with - Is her right - and, her duty.

AND, it was his decision - to spend HIS money and time - on & with Ms. Willis. There is no cause - or assertion - she "forced" him - to do anything. Indeed, Nathan (like my Hans) - appears very capable - of doing as he pleased.

I have no doubt [that Nathan Wade was the "best man" - for the job! That is the ONLY way [that] Fani would have selected him; And, he commanded - what he is worth! Just as I did - when I "quit" NCR - over a pay dispute. Fani precluded this - by paying Mr. Wade (properly) - from the first.

In subsequent years: General Electric (GE) hired - both Hans and me - related to "USA military projects" - they were working on - in Daytona Beach, Florida (circa

1985). I accepted a position with Batelle Research (in 1986). Hans and I began Hans & Cassady, Inc. - circa 1987. My daughter (born in 1973) was one of our first employees.

Market "conditions" forced us to sell "Hans & Cassady" (and its assets) in 1996.

With the "small profit" we relocated to America's Southwest (Arizona -then California) - for employment - and became "Independent Contractors" - in Silicon Valley.

Again, I am grateful for the public service [that] you both are performing!
Ashleigh Merchant's meritless motion [B] - to disqualify Ms. Willis - attacks every Biden-Harris supporter - who seeks justice. Obviously, having no defense - for what Trump and his allies (including Michael Roman) attempted - she seeks to "prosecute the prosecutor".

Please prevent Ashleigh Merchant's "meritless motion" [B] from making it even more difficult for Americans to achieve Justice.

THANK YOU! - Susan

[A] Controversy: In fact, the City of Columbus, Ohio – did hold a Spring "Jubilee" each year. This was, a "parade" of businesses - where "floats" were created - and, women (in gowns) were placed - strategically - upon cars [that] were FOR SALE.
... The cars were really "for sale" - but pretty women – displayed on top of them - made it exciting - to look at - the parade. In 1966 - my sister Carol - was placed atop - a "Chevrolet" car - because, my sister Millie - was married - to the "top salesman" (of a Columbus, OH - Chevrolet Car Dealer); AND, she was (and is) absolutely beautiful! My oldest sister [Barbara] was married

- to a policeman - and, also very beautiful. And, I have a "younger" sister - Debbie. ... The Jubilee parade - "wound" slowly through the streets of Columbus, Ohio - in 1966- to cheering crowds - lining the streets. Local high school bands played. The end-point - was "Sunshine Park" - where a "beauty pageant" - was held - upon a stage - erected for this purpose. ... My sister "Carol" was the most beautiful contestant. And, she also walked the best. For, she had "practiced" - to do so - in heels. My mother had advised her. She (Mrs. Mary Elizabeth Cassady - nee "Sprouse") could [in fact] dance in high-heels! And, after a beer - on Columbus' Broad Street - she would permit men - to literally swing her around - which was - the dance style - of her time - called "swing". My father disapproved - of her doing this - after they were married.

The "controversy" erupted (that day) - because, my cousin - "Howard Hop Along Cassady" - was on the "Judging Panel" - for contestants. Howard grinned - and, admitted THAT my sister - Carol - was his "cousin". Which, my sister - (then) was "disqualified" - from being selected (at all). However, at the appropriate time - Howard left the stage - and, came over to shake - ALL of the assembled Cassady Family - hands. Which, when combined - with the "Sprouses" [My Mom was one of thirteen children - born by Zora Elizabeth Sprouse (nee "Miller") - we were a big group! By doing this, [shaking our hands] - Howard turned a sad moment - into a "happy" moment! ... Carol kept her composure, married - and, had two girls - with a man [that] she loved.
